

The H<sub>2</sub>O Filter Pumper is made from quality food grade plastics. The ceramic filter conditions about 600 gallons of water. An easy pumping force and high flow volume can be easily maintained with periodic cleansing of the ceramic filter. Depending on turbidity levels the filter can be scrubbed clean with a scouring pad every 2 to 10 gallons as shown in the photo above. The filter is effective for removing disease causing agents as long as the white outer ceramic shell is intact and it may be scrubbed up to 100 times. The filter's second layer consists of activated carbon. The carbon layer lasts for about 600 gallons. It is recommended to replace the filter yearly.

The pump's foot valve has a suction screen or an intake hose with suction screen to strain larger particles from the water before it enters the pump or filter. The suction screen is washable and reusable.

Potable Filtered Water That  
Is Easy To Pump Anywhere

# H<sub>2</sub>O FILTER PUMPER

featuring Doulton® ceramic technology

The Group  
Excursion  
Filter  
Pumper

The Trail  
Companion  
Filter Pumper

US patent #: 6,334,760 BI

**Filters about 600 gallons**

Removes Infectious Diseases

Works Great for

- natural disasters
- camping
- fishing trips
- whitewater rafting
- and many other outdoor activities

Discover More Inside

## H<sub>2</sub>O FilterPumper features

### Doulton® ceramic technology

The triple stage filter consists of a layer of **ceramics**, **activated carbon** and an **ion exchange resin**.

Silver incorporated into the ceramics prevents bacteria from growing on the surface.

#### **ceramic filtration**

removes tiny particles and turbidity

99.99% filtration at 0.9 micron

#### **bacteria removal**

E.coli 99.99% - Shigella 99.999%

Vibrio Cholera 99.99%

Salmonella Typhi 99.999%

Klebsiella Terrigena 99.99%

#### **cyst removal**

Cryptosporidium 99.999%

Giardia 99.999%

#### **activated carbon**

reduction and removal of chlorine and trace organics...

improves taste

#### **chlorine reduction**

#### **trace organics removal**

insecticides herbicides

trihalomethanes phenols

polyaromatic hydrocarbons

#### **ion exchange resin**

reduces lead and other heavy metals

H<sub>2</sub>O Filter Pumps are offered in a kit with a durable carrying case, scouring pad and a two and a half gallon collapsible water container. Or if you prefer you can build your own kit at:

[www.filterpumper.com](http://www.filterpumper.com)

The **H<sub>2</sub>O FilterPumper** is a perfect companion for anyone who enjoys the outdoors. Made from quality food grade plastics, the pump will last many years with proper use.

## H<sub>2</sub>O Group Excursion Pump

Part #: H<sub>2</sub>OFP6

### Product Specifications:

**entire kit dry weight:**

6.5 pounds (3 kg)

**pump dry weight:**

5 pounds (2 ¼ kg)

**pump dimensions:**

36 x 9 x 4 inches (91.4 x 22.8 x 10.1 cm)

**pumping volume:**

6 oz (177 ml) per stroke

**intake & outlet hose length:**

6 foot (1.8 m)

- provides clean drinking water after natural disasters
  - works great for large groups of people
  - can be used for outdoor recreation
- The intake hose allows you to pull water approximately five feet above the surface.
- tall pump design, operator can stand while using the pump

## H<sub>2</sub>O Trail Companion Pump

Part #: H<sub>2</sub>OFP4

### Product Specifications:

**entire kit dry weight:**

5 pounds (2 ¼ kg)

**pump dry weight:**

3.5 pounds (1 ½ kg)

**pump dimensions:**

16 x 9 x 4 inches (40.6 x 22.8 x 10.1 cm)

- provides clean drinking water after natural disasters
  - works great for large groups of people
  - can be used for outdoor recreation
- compact design to fit into packs
- will pump in as little as one inch of water

Both of the H<sub>2</sub>O Filter Pumper models are so easy to use the whole family can pump clean filtered water, even the kids.
